# Problem M <br> Mingle Lineup 

Time Limit: 3 seconds
Memory Limit: 512 megabytes
Imagine you are organizing a show at school. You already have $n$ students from group A standing in a vertical line, with their heights in order as $a_{1}, a_{2}, \ldots, a_{n}$. Just then, a group of students B consisting of $m$ students with heights $b_{1}, b_{2}, \ldots, b_{m}$ want to join the line.

The catch is that the students from group A want to keep their positions the same, but the students from group B are very flexible and can stand anywhere: right at the beginning, between any two students in the line, or at the end.

A mistake is counted when a taller student stands in front of a shorter one. So, after inserting the students from group B into group A, what is the minimum number of mistakes you can arrange?

## Input

Each test consists of multiple test cases. The first line contains one integer $t\left(1 \leq t \leq 10^{4}\right)$ - the number of test cases.
$\square$ The first line of each test case contains two integers $n$ and $m\left(3 \leq n, m \leq 10^{6}\right)$ - the number of students in group A and B, respectively.
$\square$ The second line each input test case contains $n$ integers $a_{1}, a_{2}, \ldots, a_{n}\left(1 \leq a_{i} \leq 10^{9}\right)$ - the heights of students in group A.
$\square$ The third line of each input test case contains $m$ integers $b_{1}, b_{2}, \ldots, b_{m}\left(1 \leq b_{i} \leq 10^{9}\right)$ - the heights of students in group B.

It is guaranteed that the sum of $n$ over all input data sets does not exceed $10^{6}$ and the sum of $m$ over all input data sets does not exceed $10^{6}$.

## Output

For each test case, output one integer - the minimum number of mistakes that you can arrange.
Sample Input

## Sample Output

| 3 |  |  |  | 4 |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 3 | 3 |  |  |  | 0 |
| 3 | 2 | 1 |  |  |  |
| 1 | 2 | 3 |  |  |  |
| 3 | 4 |  |  |  |  |
| 1 | 2 | 3 |  |  |  |
| 4 | 3 | 2 | 1 |  |  |
| 5 | 4 |  |  |  |  |
| 1 | 3 | 5 | 3 | 1 |  |
| 4 | 3 | 6 | 1 |  |  |
